5 A quick release assembly includes a handle having a key
6 and a piston having a bore. A cam is held by a cap for
7 rotation in the bore. One of the opposing ends of the cam
8 has a keyway that capable of receiving the key. A catch
9 assembly is disposed with the key and the keyway, which is
10 capable of securing the key to the cam in response to
11 receipt of the key by the keyway.
